POLISH - Native

ENGLISH - B2

RUSSIAN – A2/B1

MAIN INTERESTS

Hello! I'm Codecool graduate - 12 month intensive programming school. I was mostly focused on back-end skills but also learned front-end part. Learning consisted in acquiring knowledge from the Internet as well as from books

One of my biggest project was a system to manage students in school. Implementation lasted almost 3 months. Project was made by 3-person team in Scrum Methodology. Work was divided into 6 sprints: Design, DataBase, Testing, Front-End, Back-End, Maintenance. I liked the most part where I had to invent logic in one of the Students Account activity: Fundraise System. Many users could collect money together for a given purpose, for example: remote work

I often try to resolve new and new exercices on HackerRank. During tasks I focus on choosing out of box thinking and designing my solution or create algorithms that can perform as quick as possible

TECHNICAL SKILLS

- Python 3.*
- GIT Version Control
- Flask 1.0
- ML & DL libraries
  - tensorflow / keras
  - numpy
  - sklearn
- SQL
- HTML / CSS / JS
- LINUX OS

- SOLID
- Multi-threading
- OOP
- HTTP
- SCRUM
- Design Patterns:
  - MVC
  - Factory
  - MVC

PRESENT AND FUTURE

Currently I deepen my knowledge in the machine leaning/deep learning and Django frameworks. It would be pleasure for me to join to some project where I could have real influence on its development process. In future I would like to learn more Programming Languages.

WORK EXPERIENCE

May 2018 - currently	**BNP Paribas** Junior Software Analyst / Junior AI Developer
April 2018 – May 2018	**CodeCool Charity App** Application for "Stowarzyszenie Wiosna" (Java EE/Spring)

EDUCATION

2017 - 2018	**Codecool** Junior Python/Java Developer
2012 - 2017	**AGH University of Science and Technology** Civil Engineering

INTERESTING THINGS ABOUT ME

I like to spend time actively. I swim, play table tennis and roller-skate. I'm fascinated with new technologies, mainly with mobile and smartphone technologies. One of my interests is to deepen knowledge about AI and machine learning stuff. I genuinely believe it's going to have an enormous influence on future life.
